

**Milner Ridge Correctional Centre is using Force Flow SpillSafe™ Scales to monitor their chemical usage safely in the new water treatment facility.**

Four (4) Model 26-SC6-HA3 Spill Safe™ Scales tied into one (1) Wizard 4000-4 indicator are utilized to remove the potential for a hazardous chemical spill, while accurately monitoring chemical usage data, such as how much has been fed and how much remains. Nuisance spills are an everyday occurrence in a water treatment plant, and the deck will prevent these spills from contaminating the floor level. Should a larger accidental spill occur, a roll out bladder deploys enabling the system to hold a total of 66 gallons.

**About:**

Force Flow is a privately held company located in Concord, California with over 40 years in the water and wastewater industry, factory trained personnel on six continents, and installations in over 100 countries. Force Flow has continued to take the lead as the innovator in chemical monitoring with products like the WIZARD 4000® Chemical Inventory Management System and the CHLOR-SCALE 150® for cylinders. Perhaps as important as being a technology innovator is their commitment to customer service, they offer 5-year warranty & performance guarantees on all their equipment.
