

STANCO PROJECTS LIMITED

ANOTHER SUCCESSFUL PROJECT BY: Stanco Projects Limited, Liquid Division

September 2009 – The Village of Harrison Hot Springs, BC
62' Diameter x 33' High - Nominal Capacity of 2,278 m³ (734,000 USG)
Glass Fused to Steel Potable Water Storage Reservoir

Consulting Engineer: Dayton & Knight Ltd.
General Contractor: Timbro Contracting Ltd.

Why choose an Aquastore® Tank by Stanco Projects Limited?

Stanco Projects Limited has been providing water storage solutions since 1975, and we are the premier tank supplier in Western Canada. We provide our clients with turn-key solutions for water, waste water, and leachate storage.

Stanco Projects Limited provides the client with a high quality, low maintenance tank which equates to future savings. The initial cost of a storage tank is never the complete cost!

- Aquastore® tanks NEVER need to be re-coated.
- Aquastore® tanks have the lowest life cycle cost
- Aquastore® tanks are expandable

Simply stated, the Glass-Fused-to-Steel Aquastore® tank coating is the best coating on the market today; ask Stanco Projects Limited to show you a life cycle cost analysis.
